# BREATHER DRYER FOR BARRELS AND IBC

During storage and processing of substances in drums and IBC containers, humid air from the environment is attracted. This humidity contaminates the storage medium. For example, isocyanate crystallizes, oils become saturated with water, and biofuels form bacteria and sludge.

To protect the hygroscopic substances in drums and IBCs, the GIEBEL breathing dryers are a very effective solution.

Whether standing or lying barrels, whether plastic or stainless steel IBCs, whether container respiration or active removal, a properly designed drum ventilation filter ensures dry supply air.

GIEBEL has developed the VENT PA and VENT MA series for the protection of isocyanates, polyols, oils, fuels, etc. in drums and IBCs.

## APPLICATIONS

GIEBEL Adsorber® are used for example:

- Isocyanates and polyols for storage and processing in PUR system
- Gasoline storage of test facilities
- Insulating oils for transformers
- Hydraulic oils for mobile machines
- Gear oils for turbines & generators
- Catalysts for chemical processes
- Epoxy resins as potting compound
- Adhesive for carrier fabric
- and many more !
