

PRODUCT CODE: TCAE-5

TCAE-5 Thompson Coupling (shown with flanges)

Unfactored power up to 300kW (402HP) @ 1440rpm

COMMON USES

Shown here with customised matching quick-release shaft flanges in position.

For higher power demand situations such as high pressure water pumps, compressors, steel mill run-out tables and rolling mill drives, agitators, and drive rollers on conveyor belts.

- No need for laser alignment,
- maintenance free,
- reduced operating costs,
- quick access time for motor or pump swap out,
- and a long life span.

Capable of 10 degrees total angular misalignment in multiple planes – parallel offset, axial, or angular.
